

Bally PROFESSIONAL **plus** arcade

Expandable Computer System

**Now with
Bally BASIC
included**

Includes: Bally BASIC programming cartridge, Learning Lab programming course, built-in audio cassette jack.

The most fun game of all is learning to create your own computer programs. Now there's no easier way to learn about computers than with the new Bally BASIC system. This plug-in cartridge with built-in audio tape interface converts the ARCADE into a personal computer you can program yourself. The

Learning Lab makes it easy to learn programming while creating computer games, electronic music, and video art.

The exclusive Bally Keypad overlay provides a complete alpha-numeric entry system that's easy to learn and fun to use! Save your programs on cassette tape and trade them with friends. A complete library of BASIC software on inexpensive cassettes will expand these applications, and teach more advanced programming techniques.

The complete Bally system gives you more

More fun...

The Bally ARCADE plus uses the powerful Z-80 microprocessor and two custom-designed microprocessors that provide better sound, color and graphics than any other system.
